

Process description.

Read text, extract the number
and transform it to string (divisible
by three)

Function. Read any three digit
number and return the words.

Use string input.
Define the length of string.
1) If length between 0 and 3:
[000]...[999]

2) If length between 4 and 6:
[1,000]...[999,999]

3) If length between 7 and 9:
[1,000,000]...[999,999,999]

4) If length between 9 and 12:
[1,000,000,000]...[999,999,999,999]
